DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/30/06 has been entered.

Response to Arguments

2. Applicant's arguments filed 5/30/06 with respect to the claims have been fully considered and are persuasive. The rejections of claims 1, 11-19, 25, and 26 have been withdrawn.

Allowable Subject Matter

3. Claims 1-21 and 25-28 are allowed.

4. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose an X-ray apparatus for inspecting an object, such apparatus comprising a first collimator that is disposed between the X-ray source and the scanning zone and that is located proximate the X-ray source, wherein the first collimator is in addition to any collimator that is integral to the X-ray source, and at least one intermediate collimator disposed between the first collimator and the precollimator, said intermediate collimator having a spaced-apart relationship with respect to the precollimator and the first collimator and being substantially stationary with respect to the precollimator, as

claimed in claim 1. Claims 2-18 and 25-28 are allowed due to their dependency on claim 1. Prior art fails to disclose a method for inspecting an object, such method comprising the steps of providing an X-ray source and X-ray detector on opposing sides of a scanning zone, said X-ray source being disposed in a spaced-apart relationship with regard to the scanning zone; disposing a first collimator proximal to the X-ray source and between the X-ray source and the scanning zone; and disposing an intermediate collimator between the first collimator and the precollimator, which intermediate collimator is stationary with respect to the first collimator; as claimed in claim 19. Claims 20 and 21 are allowed due to their dependency on claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cosman (USPN 5,748,703) discloses a dynamic collimator for a linear accelerator having three tiers of jaws.
